

[0126] CLAIMS

[0127] We claim:

1. A trifunctional agent comprising:
 - a) a targeting moiety;
 - b) a medical imaging agent; and
 - c) a photo dynamic therapy (PDT) moiety.
2. A trifunctional agent according to claim 1 further comprising a linker moiety.
3. A trifunctional agent according to claim 1 wherein said medical imaging agent is a chromophore.
4. A trifunctional agent according to claim 1 wherein said PDT moiety is a porphyrin.
5. A trifunctional agent according to claim 4 wherein said PDT moiety is a substituted porphyrin.
6. A trifunctional agent according to claim 5 wherein said substituted PDT moiety is a two photon absorption PDT agent.
7. A method of imaging and treating a cancer comprising administering the agent of claim 1 to patient and administering light sufficient to activate the PDT agent.
